

DEMESHWAR RANA

Data Scientist | Data Engineer | Werkstudent Candidate

Berlin, Germany | +49 155 1136 7158 | demeshwarrana187@gmail.com | [LinkedIn](#) | [GitHub](#)

Work Authorisation: Student Residence Permit (Germany) — eligible for Werkstudent roles (up to 20 hrs/week)

PROFESSIONAL SUMMARY

MSc Data Science & AI student at Gisma University (Potsdam) with practical experience delivering end-to-end ML solutions — from pipeline design to interactive deployment. Built predictive models using Python, Scikit-learn, and XGBoost, and deployed real-time dashboards via Streamlit for healthcare and automotive use cases. Internship at IIT Mandi's Centre of AI and Robotics sharpened skills in applied data analysis and cross-functional collaboration. Eager to contribute in a Werkstudent role in Data Science or Data Engineering, bringing analytical rigour, a fast-learning mindset, and genuine passion for turning data into decisions.

TECHNICAL SKILLS

Languages	Python, SQL (basic — actively improving)
ML / AI	Scikit-learn, XGBoost, Random Forest, Regression Analysis
Data Processing	Pandas, NumPy
Visualisation	Plotly, Matplotlib, Seaborn
Deployment & Tools	Streamlit, GitHub, Jupyter Notebook
Engineering	SolidWorks (3D Modelling, Motion & Stress Analysis)

EDUCATION

M.Sc. in AI, Data Science & Digital Business

Dec 2025 – Dec 2027 (expected)

Gisma University of Applied Science, Potsdam, Germany

- Key modules: Machine Learning, Business Analytics, Data-Driven Decision Making, Digital Business Strategy

B.Tech in Mechanical Engineering

Aug 2021 – Jun 2024

Jawaharlal Nehru Government Engineering College, Sundernagar, India

- Strong grounding in analytical thinking, systems design, and quantitative problem-solving

Diploma in Mechanical Engineering

2018 – 2021

Government Polytechnic College, Sundernagar, India

WORK EXPERIENCE

Robotics & Data Intern

Jan 2024 – May 2024

Centre of AI and Robotics – IIT Mandi, India

- Designed and validated a full 3D quadruped robot model in SolidWorks; ran motion and stress analysis to resolve structural weak points before fabrication
- Engineered a complete cleaning assembly for a ship hull robot using mechanism inversion to achieve precise 45° brush oscillations; modelled all custom parts in SolidWorks

PROJECTS

Strategic Paediatric Bed Demand Forecast

Python · XGBoost · Streamlit · Pandas

- Forecast paediatric bed demand in North Delhi using real-time AQI data; automated 48-hour operational guidance pipeline and deployed a live Streamlit dashboard for resource allocation

Market Performance & EV Transition Analysis — BMW Group

Python · Plotly · Pandas

- Analysed BMW's EV strategy across sales, battery, and manufacturing data; built interactive Plotly visualisations for stakeholder storytelling on long-term market competitiveness

LANGUAGES & ADDITIONAL

Languages	Hindi (Native) English B2 German A2 (actively improving)
Activities	Peer mentor in Data Visualisation; Sales Executive (customer engagement); Community outreach volunteer
